ABOUT

Data Scientist with a strong software engineering background and experience building AI-enabled data products and scalable analytics solutions in healthcare. Known for leading end-to-end initiatives across machine learning, reusable feature platforms, and user-facing tools, while translating complex work into clear business value.

CERTIFICATIONS

- IBM Data Science Professional Certificate
- Applied Machine Learning and AI (eCornell)
- Generative AI Technician (Cigna)

EDUCATION

B.S. Computer Systems Engineering
Instituto Tecnológico de Mérida

LANGUAGES

English (Native), Spanish (Native)

PROFESSIONAL EXPERIENCE

Evernorth (Cigna) — Data Scientist

Oct 2022 – Present

- Lead AI-enabled data products and analytics solutions supporting clinical and operational decision-making.
- Built and led the Feature Template Engine backend platform, enabling scalable and reusable feature generation for ML workflows.
- Contribute to a Template Store (backend + UI) with LLM-powered feature discovery so users can explore analytical assets through natural language.
- Developed end-to-end ML solutions including GLP-1 utilization identification and opioid overdose risk models using Python, PySpark, Databricks, and LightGBM.
- Support AI enablement through practical demos, training materials, and guided workflows for technical and non-technical users.

Accredo Health (Cigna) — Data Reporting Engineer

Dec 2015 – Oct 2022

- Delivered reporting and data solutions supporting operational performance and business decision-making.
- Partnered with stakeholders to translate requirements into analytical outputs and dashboards.
- Improved data quality, transformation logic, and usability of enterprise reporting assets.

Cigna / Express Scripts — Business Analyst

Mar 2013 – Dec 2015

- Translated business requirements into technical solutions and supported UAT, validation, and stakeholder communication.

AgileThought — Software Engineer

Oct 2006 – Mar 2013

- Developed enterprise systems and data workflows, building a strong foundation in backend systems, pipelines, and software design.

Core Skills

AI/ML product development , Predictive modeling, Feature engineering, Python, SQL, PySpark, Databricks, Cursor, Visual Studio Code, gitHub, LightGBM, XGBoost, Streamlit, React, Oracle PLSQL, Stakeholder communication, Cross-functional leadership.
